SENATE ACTIONS

- **Passed a motion from the Curriculum Review Committee to approve the list of curriculum changes.**
- **Passed a motion from Part-time Faculty Committee recommending revisions to University Rule 3359-20-04.3 that would provide benefits and privileges for retired part-time faculty.**
- **Passed a motion from the General Education Chairs Committee.**
- **Approved the Commencement List for Fall 2015.**

Minutes of the Faculty Senate Meeting of December 3, 2015

The regular meeting of the Faculty Senate took place Thursday, December 3, 2015 in room 201 of Buckingham. Senate Chair William D. Rich called the meeting to order at 3:00 pm.

Of the current roster of 61 senators, 52 were present for this meeting. Senators Cutright, Haas, Huss, Lillie, Moritz, Pope and Samangy were absent with notice. Senators Elliott and Hreno were absent without notice.

I. Approval of the Agenda

Senator Raber moved to adopt the proposed agenda. The motion was seconded by Gatzia. Chair Rich asked that we add a report of the Committee of the Chairs of the General Education Learning Outcomes Committees to the agenda.

The agenda was adopted as amended without dissent.

II. Approval of the Minutes

Senator Schaeffer moved to adopt the proposed minutes of the September meeting. The motion was seconded by Senator Clark.

The September minutes were adopted without dissent.

III. Remarks of the Chairman

Among the items on today's agenda are curriculum proposals from the Curriculum Review Committee for the Senate's approval; a proposal from the ad hoc Committee of Chairs of the General Education Learning Outcomes Committees to amend the General Education Implementation Plan; a proposal from the Part-time Faculty Committee to establish benefits for retired part-time faculty members; and an informational report from the Academic Policies Committee on the problem of late book orders.

As Secretary Schulze will report shortly, the Executive Committee has appointed seven Senators to the ad hoc committee to consider proposing a resolution expressing a lack of confidence in President Scarborough. Soon I will convene the first meeting of that committee so that it can elect a chairperson and begin its work.

December 3, 2015

The University of Akron Chronicle

As you might imagine, I've been giving a great deal of thought lately to the University's current predicament. I wish to offer the following observations and comments.

First, we tend to think of the University as a sturdy institution, relatively immune to buffeting winds, but I believe it is more fragile than we sometimes recognize. It has sustained much damage in the last several months, the effects of which are likely to last much longer than it took to incur them. It is incumbent on all who care about this institution, administrators and faculty included, to take care not to inflict further damage, however well-intentioned their actions may be.

Second, in his State of the University address and in speeches in other venues, President Scarborough has said that the University of Akron is poised to be "a national university of international reach," and spoken of his desire to make this a great university. At the same time, he has argued that the economics of public higher education require the University to invest less in tenure-track faculty positions and more in non-tenure track positions. Let us be clear: a university does not become great by hiring fewer tenure-track faculty and relying more heavily on non-tenure track faculty; it thereby moves away from rather than toward greatness. The great universities of this country are great because they have great faculties, and great faculties are overwhelmingly tenure-track.

There is, however, a truth underlying the President's argument about the economics of higher education. With the state legislature gradually disinvesting in public higher education while prohibiting the state universities from making up for the loss of state funding by raising undergraduate tuition charges, the University is forced to find more economical ways of teaching its undergraduate students while minimizing the loss of quality of education. Traditional tenure-track faculty – especially those who teach at the graduate and especially at the doctoral level – devote significant time to research and graduate instruction, and, consequently, tend to do less teaching at the undergraduate level. The lower their undergraduate teaching loads, the less economical undergraduate education is. This has resulted in increased reliance on part-time faculty for undergraduate instruction but, because part-time faculty are paid so little and often must teach at more than one university in order to cobble together even a meager living, the quality of undergraduate education suffers. The President's solution is to hire more full-time, non-tenure track faculty who have relatively heavy teaching loads and little or no research responsibilities. Although this is less economical than relying heavily on part-time faculty, it is also less likely to

December 3, 2015

The University of Akron Chronicle

compromise the quality of undergraduate instruction and is more economical than relying heavily on traditional tenure-track faculty.

This solution has its drawbacks, of course. First, to the extent that the greatness of a university is determined by its contribution to the advancement of knowledge, increased reliance on full-time, non-tenure track faculty does not move a university in the direction of greatness. But as long as state support continues to decline and caps continue to be placed on undergraduate tuition increases, state universities sadly may be unable to move toward greatness.

Second, the strongest protection for academic freedom, by far, is tenure. Non-tenure track faculty are in insecure positions. The highest quality of instruction generally occurs when students are taught by relatively independent professionals who are well respected and secure in their positions.

Third, other things being equal, a university would have to pay higher salaries to hire high-quality faculty in non-tenure track positions than to hire faculty of equivalent quality in tenure-track positions. As long as the tenure-track positions a university creates are likely to continue to be needed throughout the careers of those who are appointed to fill them, tenure-track positions are more economical for the university than are non-tenure track positions – again, assuming equivalent quality. For these reasons, I believe it is worth considering an alternative to hiring non-tenure track faculty in order to achieve more economical, high-quality undergraduate instruction. Teaching and research loads already vary from university to university, college to college, department to department, and to some extent even within departments. Why can't the need for economical but still high-quality undergraduate instruction be filled by tenure-track faculty who are hired, and choose, to teach extensively, do enough research to stay current in and engaged by their academic disciplines, take special responsibility for ensuring high quality instruction and the advancement of teaching methods and technologies, and contribute to the scholarship of teaching? Can there not be more than one tenure-track model, each with different requirements and expectations concerning the balance between teaching and research responsibilities? I propose that the faculty and the administration of this university begin to explore these possibilities together, instead of continuing the unproductive – even destructive – and, I think, misconceived conflict over whether the University can afford to hire more tenure-track faculty.

This concludes my remarks. I wish you a happy and restorative holiday season.

III. Reports

Executive Committee

Senator Schulze reported as follows on behalf of the Executive Committee:

Since the Faculty Senate last met on November 5th, the Executive Committee met twice by itself and once with the president.

The Executive Committee met on November 19th for regular Senate business and to prepare for the meeting with the president.

- The EC made appointments to one University Council committee. Scott Randby was appointed to the Information Technology Committee.
- The EC notified the Dean of the University Libraries that she needs to conduct an election to fill the UL Senate seat that will become vacant at the end of the semester.
- The EC certified the elections of Senator Rob Schwartz in the College of Health Professions and appointed John Zipp to the APC admissions subcommittee.
- The EC also discussed possible candidates for the ad-hoc Committee to Consider a Vote of No Confidence in President Scarborough.

Later that day, we met with the president. We were updated on the following topics:

- the Gen Ed Core 13,
- the general education coordinator position;
- the search for Assessment Director, which is scheduled to begin in December with a committee that includes members of the faculty
- progress on decisions regarding allocation of graduate assistantships for FY 2017;
- documentation on the Honor's Dean's academic rank from the University of Toledo; and
- the process for reactivating suspended and revised degree programs.

The EC next met on November 24th for regular senate business and to discuss the agenda for the upcoming faculty senate meeting.

We discussed whether "TBA" can be used for the location of classes that are not online—for example, independent investigations; the EC decided to ask the APC to look into it. We discussed recent discussions the president has had with Graduate Council regarding funding for graduate assistantships.

The EC made committee appointments:

- Alper Buldum was appointed to the Faculty Research Committee.

December 3, 2015

The University of Akron Chronicle

- David Perry was reappointed to the Natural Science General Education Disciplinary Learning Outcomes Committee.
- Xin Feng was appointed to the Critical Thinking General Education Tagged Learning Outcomes Committee.

The EC asked the CBA to nominate a replacement for Emeka Ofobike on the Domestic Diversity General Education Tagged Learning Outcomes committee.

The EC discussed appointments to the ad-hoc committee to consider a vote of no confidence in the president. We appointed seven faculty senators to that committee, contingent on their willingness to serve. Of the seven, four subsequently accepted their appointments and three declined. By e-mail, the EC agreed unanimously on three additional appointments. All three subsequently agreed to serve. The ad hoc committee consists of the following Senators: Coffey, Mitchell, Gatzia, Matejkovic, Landis, Feltey, and Quinn.

This concludes my report.

Remarks of the President

The president updated the Senate on things that the administration has been working on. The beginning of the fiscal year was consumed with the implementation of the new budget and the very difficult decisions that were made during that time period. We also began the implementation of new initiatives that were funded in the new budget: the new Center for Experiential Learning and Entrepreneurship, the Center for Data Science, Analytics, and Information Technology, the new Center for Dance Choreography, the new Corps of Cadets and Leadership Academy, and the continuing work on the Gen Ed initiative out of Wayne College.

We also hired a new director of athletics, Larry Williams. We launched the new marketing campaign with the new videos, including the LeBron James marketing video. We concluded a process that we call a faculty hiring phase 1, which approved 55 faculty searches, and initiated a number of community meetings to try to describe to the community the necessity for some of the budgetary changes.

Recently we submitted our state capital requests for the next biennium. The Honors College and University Libraries are working on their strategic plans. We have been meeting with colleges, and hope to have faculty hiring phase 2 completed by December 15th.

We continue to work on an international strategic plan that the board has requested. We continue to evaluate and look for opportunities to strengthen our satellite campus

December 3, 2015

The University of Akron Chronicle

structure. We have five satellite campuses. The only one that's really functioning at a high level is Wayne College in Orville, Ohio.

We are spending time preparing for a number of searches for positions, including Provost, Dean of the College of Engineering, Director of Facilities, Director of Development, and General Counsel.

Remarks of the Provost – The provost sent written remarks (Appendix A).

IV. Approval of Commencement List for Fall 2015

Senator Nofziger moved to adopt the commencement list (Appendix F). The motion was seconded by Senator Bouchard.

The motion was adopted without dissent.

V. Committee Reports

Academic Policies Committee

Vice Provost Ramsier reported. The Academic policy Committee has submitted a written report for information only about the ordering of textbooks. The APC requests that all senators read the report, share it with colleagues, and have a discussion about how we may do better at each unit in getting textbooks order in a timely manner.

Chair Rich: As a member of APC, I can report that it is the Committee's fond hope that you will all have read or will read that report and give it some thought. If there are questions, this would be a good time to raise them.

Senator Bouchard: Since electronic ordering, we never get the initial request for book orders. The first time that most of us hear about it is a desperate e-mail from the bookstore saying it is wildly late. None of us can find the link from last semester. If they sent out the link around October 1st, then we would have it, and we would do it. Due to an epic quest, I found the link last week, which is why I was able to get it in. It is not even a link that you can write down. It is the word 'faculty' underlined in blue. You have to find the right e-mail. It is not even a URL that you can store on the computer. I think it would be easier for those of us that mean well and are easily confused if we were just told, here is the URL, put it in the bookmarks, remember it in your brain, so we would not have to wait to get the reminders.

Vice Provost Ramsier: That's a good suggestion.

Chair Rich: The deadline is October 1st. The reminder should come sometime before.

Senator Bouchard: It comes around January 1st.

December 3, 2015

The University of Akron Chronicle

Chair Rich: I think that the Committee found that that's one of the problems. We don't have a mechanism in place to remind people—I don't think it focuses so much on the issue of making sure that people have a link, but that's important. We heard that a lot of faculty don't actually do the orders online themselves, and in some instances it may just be unfamiliar with the system and that others do it for them. It is clear that with the change in the technology of book ordering, the University as a whole has not adapted well to it. We need to adapt to it. There really does need to be a mechanism whereby every faculty member routinely gets a reminder at the right time with a link to the online system.

Vice Provost Ramsier: I agree. I would make sure that happens.

Senator Allen: I was having a problem with my link. Then I got in touch with—I believe her name is Friend or Friendly.

Senator Schulze: It is Friend.

Senator Allen: She said to e-mail her. This year I e-mailed her, and she confirmed the e-mail and never ordered the book. This system has some real issues, and they're not just on the faculty side necessarily. These are complicated things, the link doesn't always work, you can then e-mail it, and get confirmation, and then the book isn't necessarily ordered properly.

Senator Nofziger: I managed to read it quickly. One of the things mentioned is that there are a lot of classes listed as TBA because sometimes we don't know who we're going to hire to fill those classes yet, and it seems like a total violation of academic freedom to tell them what book they're going to use. I don't know how we address that unless we have full-time faculty members teaching the courses rather than adjuncts.

Chair Rich: That's something that was discussed as well in APC. The classes are not listed TBA but 'staff.' In many but not all instances they are sections of courses where all the sections use the same book, and so what the Committee concluded, and this is reflected in the report, is that whoever is in charge of the course needs to be in a position to place the book orders for all of those sections. That doesn't solve the problem if it is not a course where all the sections use the same materials. There isn't really a solution other than that faculty should be engaged sooner rather than later to teach the courses. If it really has not been determined who will teach the class, and that person must choose their own materials, then that's going to have to be an instance in which we can't really comply.

Senator Willits: I try to get my book orders in early. I follow the rules, yet every semester students don't have enough books in the bookstore. I don't see why I need to get them in so early if they won't have enough books to provide them to students who order them. Maybe you can comment on where it falls apart.

December 3, 2015

The University of Akron Chronicle

Chair Rich: Not all of our students are buying books from the University bookstore. The University bookstore knows that. They're not going to order a number of books that is equal to the enrollment in the class. They're guessing how many students will buy them from the Bookstore as opposed to Amazon.com or some other source. It could be that they are systematically underestimating, in which case perhaps they need to rethink their methods of estimation.

Senator Allen: My understanding is that they were saying that not ordering books on time could cause great harm to students, and yet they're not ordering enough for the class. That seems like having one's cake and eating it too.

Chair Rich: It's the difference between the bookstore not ordering any books for that course, and the bookstore ordering an adequate number of books.

Senator Klein: I just wanted to clarify that perhaps what they meant by this catastrophic harm is that it is linked to student financial aid. Apparently when student fees and everything is assessed for financial aid, the amount that they need for books is also pulled into this assessment. This is one reason why they need the book orders in earlier.

Senator McCollough: We invite you to put textbooks on reserve in the library if we have them. If you're reviewing your syllabus, and we have it in our inventory, it will be gone. The students are all after it. They ask for ones from OhioLink. If it is in the stacks, and you want them to have access to it, put it on reserve right away before they can check it out. You can also put personal copies on reserve. If you have a copy of the textbook, and the bookstore doesn't have an adequate number of copies at the beginning of the semester, you can put a personal copy on reserve as a stop gap.

Senator Erickson: One of the reasons for their lack of providing these inputs is the University bookstore is a monopoly. I have told students that they should find the text the cheapest way possible, and it's not allowed under the contract.

Chair Rich: Sometimes the contracting entity has difficulty disciplining its employees.

Vice Provost Ramsier: Especially when they're not actively pursuing such discipline. This is a good discussion, but I can't get rid of the contract.

The financial aid part is about the cost of attendance. That's where the federal government may weigh in to a single end-point server the deadlines, students are supposed to know what it will cost to attend every semester, at every school that they want to go to. That's a part of it. You're right, the financial aid piece does come from federal Title 4 moneys.

December 3, 2015

The University of Akron Chronicle

Chair Rich: The book order essentially performs two functions that don't necessarily get performed together. One is notifying the students of what the books are and what the costs will be so that they can determine the total cost of attendance, and the other is the bookstore to some extent orders the books mostly except in some circumstances. Even if the bookstore went away, and we were just having our students order the books wherever they wanted, we would still need to put that list out there.

Vice Provost Ramsier: The federal government requires that the list be public. Something connect to this is I would ask the Faculty Senate and their colleagues to carefully consider the adoption of customized textbooks. We adopt those thinking we are doing the students a favor by customizing a book by, for example, taking out chapters we are not going to use. Often the students end up paying more because, you look at the contract with the bookstore, there is a different pricing structure for standard and customized textbooks. Many times the custom books can't be rented or sold back to the bookstore. The total out-of-pocket cost can actually go up for a student, even though faculty thought they were doing the right thing by lowering the book's sticker price. Be careful with that.

Senator Sterns: I also thought that a reason why we wanted these lists to be out there ahead of time is a number of years ago there was an issue about competitive bookstores being able to have access to our list so that it is a free market issue. I understand that's state law, is it not?

Vice Chair Ramsier: I know it is a federal requirement that we have this be made public for the total cost of attendance. If it helps competition, so be it.

Senator McCullough: As somebody that's worked in a college bookstore, used bookstores, and is now a librarian, textbooks are what is called a short margin book. They make 20% on each book. This is due to the automatic pricing algorithms on the used market. That's why they're never going to want to order a lot of them. You see a low price early in the summer and high prices later starting in September. That's the free market at work. You can't count on the free market to help anybody.

Curriculum Review Committee

Vice Provost Ramsier reported. We bring forward a short list of proposals coming through the system with no further objections or open comments. We bring it to you as a motion from the Committee to approve these so we can get them on the books.
(Appendix B)

The motion was adopted without dissent.

Part-time Faculty Committee

December 3, 2015

The University of Akron Chronicle

Senator Osorio reported. The Part-time Faculty Committee would like to recommend that there be written into the rules a status of retirement for part-time faculty who have taught at the University of Akron for ten years or more. You can see the actual details for what the criteria would be for retirement. Part-time faculty that have taught here for ten years or more should have at least some of the benefits of faculty retirement. We did use the rules for faculty retirement to determine what to use here. There is a list of 13 items. (Appendix C)

Chair Rich called for the vote.

The motion was adopted without dissent.

Computer and Communications Technology Committee

Submitted a written report only (Appendix D).

Committee of the Chairs of the General Education Learning Outcomes Committee

Senator Saliga reported. The Committee brings a report proposing a change to the new General Education requirement. The natural science disciplinary requirement is two courses with one lab; the intent is a minimum of 7 hours total. We want to amend it so that major-track courses in the natural sciences can substitute for a General Education natural science course. If a student takes a higher level course like Principles of Biology, the student wouldn't need to take a Biology for Everyone type course. (Appendix E)

Chair Rich called for the vote.

The motion was adopted without dissent.

VI. Report from the Faculty Senate Representatives to the Graduate Council

Senator Allen reported. The Graduate Council recently developed a subcommittee on graduate assistantship funding. There are a lot of concerned graduate students. The Graduate Council was presented with four bins: one for research doctoral, another for professional doctoral programs, one for terminal research master's programs, and one for terminal professional master's programs. The President gave the impression that this was driven by the Trustees. He said the real concern was that we are giving too many tuition waivers for professional master's degree programs. The subcommittee's job is to address what we think. It is being convened by Eric Amos, the Vice Provost for Research and Dean of Polymer Sciences.

The subcommittee has not yet met, but Senator Allen recommended that the subcommittee also take a careful look at their estimated cost for tuition waivers. They're listing that as over \$17,000 per student, even though if we write that into grants, and we inflate it by 3% for this year, it is worth \$10,000 for 12 months. I think they're charging December 3, 2015

The University of Akron Chronicle

25% for all faculty for a research charge, yet I believe over 100 of our bargaining unit faculty are lecturers that are not even allowed to do research.

The subcommittee will look at all this and make a recommendation.

Senator Allen expressed concern about market niche. If competitor programs are offering students more graduate assistantship aid, those programs will be more attractive. We have to consider this if we want to maintain enrollment.

Chair Rich: I would encourage the members of the Committee to look at everything they think they ought to look at. If they think that categories need to be redefined or reconceived, they should consider recommending that as well. The Committee's recommendations will go to the Graduate Council and then they'll come to this body.

Senator Sastry: I'm also on the subcommittee. The four categories were traditional Ph.D. programs, professional doctoral programs, research focused master's programs, and professional master's programs. President Scarborough was clear that they're not expecting to change for the traditional Ph.D. programs. He had some suggestions on the professional doctoral programs, which we'll probably talk about when they charge to discuss this. I think the main issue under discussion for the subcommittee is going to what research focused master's programs really mean on this campus. In what cases will it be meaningful to continue tuition reimbursement? He wants programs to be both academically and economically sustainable in the long-term.

Senator Sterns: We have to consider as a group whether these changes fit with our academic missions, and whether we think this is the right way to run graduate education. We had better monitor this.

Senator Makki: I am on Graduate Council. One of the issues that came up is to examine whether we should be granting graduate assistantships for students who can pay for their tuition. Several people on the Committee mentioned that we used graduate assistantships for teaching or lab assistantships, and the proposal that I heard was that we should hire part-time faculty. Maybe it's not best practice to hire graduate assistants to serve food in the student union. That's a valid concern.

Senator Allen: I think that's why it is so crucial that we look carefully at the true cost of graduate assistantships, which means looking at the difference between how much revenue is being generated from that as well as the subsidy component versus hiring an adjunct faculty member. This is not a non-tenure track full-time faculty member, but an adjunct faculty member to make it even cheaper. Somehow that is supposed to increase University quality. We need to look at the net difference and consider the responsibility to train the next generation of teachers.

December 3, 2015

The University of Akron Chronicle

Senator Swift: I have been following this for two had a half weeks now, and I have met with Graduate Student Government. As an undergraduate student representing all of the students on campus, this I the number one concern for both undergraduates and graduates because students are very concerned about the overall experience. It is critically important to understand that there are so many other universities around us—10, 20 minutes away—offering assistantships with healthcare. Kent State on average offers \$16,000 plus healthcare for a graduate assistantship. Students may opt not to attend a university that's investing in academics. The University of Akron may have trouble attracting quality students.

Senator Erickson: When the EC met with the President last week and asked about when assistantships would be decided for the categories other than the traditional Ph.D. programs, it was pointed out that these decisions should have been made by now.

Senator Bouchard: Chair Rich, please tell the President that there is no time now to make changes for Fall 2016. We should leave things as they are. Any change to graduate funding should be made rationally, not in a hurry.

Senator Sterns: I have already had that conversation with the President. The EC has communicated this to him. I have pressed the point repeatedly over a period of months.

Senator Allen: The problem is that we talk about the cost side only. We keep cutting our budget but the University can't survive unless it increases revenue. We need to concentrate on fundraising rather than only budget cuts.

VII. Report from Faculty Senate Representatives to University Council

Senator Erickson reported. University Council met on November 10th. The Council talked about the meeting with the representative of the Association of Governing Boards, the fact University Council doesn't yet know when it will meet with this person. Vice President Burns gave a presentation about the activities of his office. They discussed the goals of all the UC committees. The tenured faculty on UC are the only ones who feel free to speak their minds without fear of retribution.

Senator Sterns added that Vice President Burns talked about his background and his responsibilities at the University of Toledo medical college. Senator Sterns described staffing changes. There are many new people. We lost older people that had many years of relationships with the community, especially in the area of development. Our recent staff transitions have created ill-will in the community.

VIII. Good of the Order

Senator Schulze reminded the Senate that Faculty First Friday is tomorrow at 5:00 at Lockview. All bargaining unit faculty are invited to attend.

December 3, 2015

The University of Akron Chronicle

IX. Adjournment

Meeting was adjourned at 5:00.

Any comments concerning the contents in *The University of Akron Chronicle* may be directed to the Secretary, Pamela A. Schulze (x7725). facultysenate@uakron.edu

December 3, 2015

Appendix A

Faculty Senate
December 3, 2015
Provost Mike Sherman Comments

As you know, it is unusual for me to miss any Faculty Senate meeting; let alone two in a row. A health-related issue emerged that requires me to be absent from campus both today and tomorrow. Nonetheless, I wanted to provide a few comments.

This semester has moved quickly as we welcomed an incoming class that was both as academically prepared and larger than last year's incoming class. In addition, our efforts to improve student retention and persistence resulted in fall enrollment higher than was projected for the FY16 budget. Many of the efforts which you have supported illustrate more students taking 15 or more credits per semester contributing to the fact that over the last five years we have graduated increasingly more students.

Many of our colleagues working with the Division of Student Success have helped us remain vigilant on matters related to retention and persistence and I look forward to the successful outcomes of those continuing efforts. Many of the same and other colleagues are also involved in helping implement and utilize UA Analytics to identify gateway courses that along with other information, will help us better advise and serve students as they pursue their programs of study.

Questions have emerged about the data associated with recruiting the fall 2016 incoming class. While it is important to have updates on this information, it is really to early to make informed judgments about next year's incoming class, and even difficult to compare year to year because every year we alter our processes and activities to improve our outcomes even more.

I encourage all of us to continue our individual and collective efforts to identify to the community the attributes of our academic programs that makes them distinctive as well as emphasize the quality of the educational experience. In addition to offering those perspectives, I also indicate our retention and graduation rates are on the rise, we have a strong focus on out of the classroom experiences, and that our job placement rates are very good. I know you have your own positive pitch for our programs and I urge us to share them with each other so we can collectively improve our advocacy for a unique educational experience gained by attending the University of Akron.

All the best for a great final few weeks of the semester and I look forward to seeing you on campus, or at graduation. Have a great holiday season as well.

PTFC reports, November 2015

The PTFC met in November to finalize the resolution regarding retirement for Part-time Faculty, offered for approval today. An election is in progress to select the second Part-time Faculty Senator. The PTFC will meet again February 2, 2016.

Respectfully submitted, S. Osorio, Chair

December 3, 2015

The University of Akron Chronicle

Whereas, the University values the academic and community contributions of its adjunct faculty and

Whereas approximately 40 percent of part-time faculty have taught 10 years or more

Whereas, adjunct faculty who retire from the University of Akron should be entitled to some of the benefits enjoyed by other retired faculty and staff,

Be it resolved that the following changes be made to the Rule # 3359-20-04.3 regarding retirement status and benefits for part-time faculty:

1. Add Section 3359-20.04.3D with the heading "Part-Time Faculty Retirement"
2. This section will define retirement for part-time faculty as "a part-time faculty member who files with STRS while teaching part time at The University of Akron and having taught at least 20 semesters and 60 credit hours at The University of Akron."
3. Retired part-time faculty shall receive the following benefits:
 - (1) No fee parking in any university lot except in metered and handicapped spaces. However, all retired part-time faculty that continue as, or are rehired into any position as a full-time or part-time employee at the university are subject to the same parking permit fee assessments as described in OAC 3359-46-02.
 - (2) Athletic and cultural events. Retired part-time faculty members are granted half-price admission to all university athletic events and special rates for certain cultural events.
 - (3) Fee reductions for retired part-time faculty up to one three credit course per semester or summer session.
 - (4) Recreational facilities including the natatorium, gymnasium and playing fields are open to retired part-time faculty at the same time as to other faculty.
 - (5) Credit union. All retired part-time faculty members are eligible for membership in the Towpath credit union.
 - (6) The bookstore at the University of Akron. Retired part-time faculty members may purchase books and other supplies through the bookstore, ordinarily at a discount.
 - (7) Notary public. Notary service is available in the offices of talent development and human resources and general counsel at no cost to retired part-time faculty members.
 - (8) Retired part-time faculty retains full faculty privileges for the use of the libraries and may use the emeritus study room in Bierce library.

December 3, 2015

The University of Akron Chronicle

(9) Part-time teaching assignments as needed.

(10) Office or laboratory space, supplies and secretarial assistance, and computer services may be provided by special arrangement with the appropriate department.

(11) Retired part-time faculty may submit externally funded grant/contract proposals through the University of Akron. Retired part-time faculty members are

not eligible for university funded research grants or summer fellowships.

(12) If funding is available, there may be partial or full payment of travel and subsistence expenses incurred at educational and professional meetings.

(13) Access to computer center and information services privileges normally provided to active part-time faculty.

Computing & Communications Technologies Committee Particulars

- Subject: Computing & Communications Technologies Committee meeting report
- Date: [2015-11-23 Mon]

Report

The CCTC met on Thursday, November 19. The committee began the process of revising the resolution regarding online evaluations as instructed by the Faculty Senate. The committee also discussed some concerns and uncertainties regarding a rumored faculty laptop refresh. The CCTC plans to address these concerns with the CIO (Godfrey Ovwigho).

Scott Randby
CCTC Co-Chair

Appendix E

Recommendation from the General Education Chairs Committee

Revise the Implementation Plan from:

The following distribution of courses is recommended to operationalize the proposed General Education Learning Outcomes for the *Academic Foundation* and *Disciplinary Areas* (note that a course was assumed to default to a minimum of 3 credit hours):

- *Academic Foundation*
 - Writing—2 courses (min. 6 hours)
 - Students who are placed in the second Written Communication course and successfully complete it thereby satisfy the General Education Written Communication requirement.
 - Speaking—1 course (min. 3 hours)
 - Quantitative reasoning—1 course (min. 3 hours)
 - Students who successfully complete a mathematics or statistics course (2030:***, 3450:***, or 3470:***) with a prerequisite that satisfies LO 2.b.i thereby satisfy the General Education Quantitative Reasoning requirement.
- *Disciplinary Areas*
 - Natural science—2 courses with 1 lab (min. 7 hours)
 - Social science—2 courses (min. 6 hours)
 - Humanities—1 course (min. 3 hours)
 - Arts—1 course (min. 3 hours)
 - Humanities or Arts—1 course (min. 3 hours)

to:

The following distribution of courses is recommended to operationalize the proposed General Education Learning Outcomes for the *Academic Foundation* and *Disciplinary Areas* (note that a course was assumed to default to a minimum of 3 credit hours):

- *Academic Foundation*
 - Writing—2 courses (min. 6 hours)
 - Students who are placed in the second Written Communication course and successfully complete it thereby satisfy the General Education Written Communication requirement.
 - Speaking—1 course (min. 3 hours)
 - Quantitative reasoning—1 course (min. 3 hours)
 - Students who successfully complete a mathematics or statistics course (2030:***, 3450:***, or 3470:***) with a prerequisite that

December 3, 2015

The University of Akron Chronicle

satisfies LO 2.b.i thereby satisfy the General Education Quantitative Reasoning requirement.

- *Disciplinary Areas*
 - Natural science—2 courses with 1 lab (min. 7 hours)
 - A majors-track course in the natural sciences can substitute for a general education natural science course.
 - Social science—2 courses (min. 6 hours)
 - Humanities—1 course) (min. 3 hours)
 - Arts—1 course (min. 3 hours)
 - Humanities or Arts—1 course (min. 3 hours)

Rationale: The material in natural sciences majors-track courses is more rigorous than what is presented in the courses designed for non-majors (what we think about when we say “general education”).

Prospective Degree Candidates for 2015 Fall**

Following are the names of prospective degree candidates who have applied by Tuesday, November 24, 2015. This list may include degree candidates who will not complete academic degree requirements and/or reconcile all financial obligations to The University of Akron. In the event of extenuating circumstances where a student applies late or has been inadvertently omitted from this list, authority is hereby granted to the Senior Vice President and Provost to cause such student to be added to this list upon the recommendation of the respective faculty, appropriate dean and/or graduate dean.
