

### **Tributes**

*Matthew Wilson*

As the director of Cooperative Engineering Education for The University of Akron, Deanna Dunn knows the importance of the student co-op experience. Dunn has placed thousands of students into co-op positions throughout her more than thirty-five years with the University and has seen the results of the program firsthand.

Having impacted the University for over a decade as a professor, interim honors dean, interim law dean, and associate provost, Sarah Cravens made an impact on students both inside and outside of the classroom.

As the director of Women in Engineering, Heidi

Cressman has constantly made an impact by recruiting more women into engineering disciplines at the University by providing the tools and resources students need to successfully complete their degrees.

Dedicating his time and resources to the University in various capacities—including as head of The University of Akron Foundation and a top advisor to the law school—Phil Lloyd has made his impact felt in terms of students, leadership, advising, facilities, and other contributions.
