

## Honors Research Project Proposal

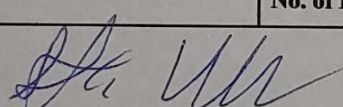

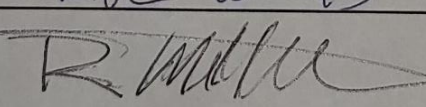

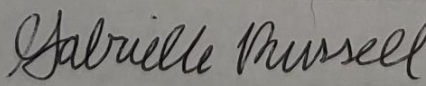

Please Print

<b>Name:</b> Travis Parago	<b>Student ID:</b> 3017720
<b>Email (@zips.uakron.edu):</b> tcd28	
<b>Title of Proposed Project:</b> Impact of chemical runoff on Ohio wetlands	
<b>Major:</b> Biology	<b>Graduation (semester/year):</b> Spring 2022

Please include a brief (maximum 200 words) summary of your proposed project

I'm going to be studying of the effects of pH change in the soil of wetland plants. I will be observing changes in ~~the~~ germinant and emergence stage of native Ohio graminoids. I will use little pots to put different seeds in and have different soil pH in each pot. If seedlings cannot get past the germinant or emergence stage in these new conditions, then wetland environments may become endangered.
