1. The following bibliography was compiled from various indices, bibliographies, and other sources on recent books, law review articles, electronic or print services, and web sites that contain information about various aspects of electronic discovery or electronically stored information. Continuing education materials, articles in legal newspapers, and practitioner publications are generally excluded.

The bibliography is organized by material type: books, law review articles, electronic or print services, and web sites. Material is then arranged by author with anonymous works presented first.
